DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 23-24, drawn to a method for arranging polymers for combinatorial synthesis and software product therefor, classified in class 702, subclass 19, for example.
- II. Claims 4-14 and 25-33, drawn to a second method for arranging polymers for combinatorial synthesis and software product therefor, classified in class 702, subclass 19, for example.
- III. Claims 15-21 and 34-40, drawn to a methods for arranging nucleic acid probes and software product therefor, classified in class 702, subclass 19, for example.

The inventions are distinct, each from the other because of the following reasons:

Each of the methods can be shown to be distinct, each from the other, because they have different method steps and/or goals. Each method would require a non-coextensive literature search.

Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
